

***Journal of Applied Crystallography***

Gernot Kosterz, *ETH Zürich, Applied Physics, 8093 Zürich, Switzerland*. E-mail: kosterz@iap.phys.ethz.ch

In its thirty-seventh year, the Journal of Applied Crystallography continues to serve a broad readership by providing an international forum for the coverage of all topics related to the development and application of crystallographic methods all across the basic and applied natural sciences. The main subject areas and major developments during the last three years will be reviewed, and the strength and potential for future improvements of the journal will be assessed. There will be ample time for the discussion of points raised at the session.
